Dear Senior Telecommunications Engineer,

Nearly the extended C-band communication satellites use the band of frequencies from 3.4 to 4.2GHz for their downlinks, There are many vital services provided via satellite services in extended C-band, I hope that we can continues working on the extended C-Band, and did not agree to change in the Allocation of the 3.4 – 3.7 GHz Band fom Fixed Satellite Service to Mobile Service.

Best regards,
