Synopsis of “Little Tinker Causes a Big Trouble”

Little Tinker is the fairy who oversees the smart use of mobile data by people in the earthly world. One day, she is overwhelmed by irresistible curiosity to see what the world will become if people no longer use mobile data smartly or protect data on their mobile phones properly. So Little Tinker secretly tampers with people’s minds, making them not able to use mobile data smartly and protecting data on their mobile phones. Little Tinker soon realises that she has caused a big trouble for what she did. A lot of problems arise shortly afterwards. For example, many people have received shocking mobile bills or become victims of personal data theft. The whole world is plagued by chaos or the “Data Disaster” as the news calls it.

Knowing that she has caused a big trouble, Little Tinker seeks help from Time Fairy in the hope of turning the clock back to make things the same as they were before the “Data Disaster”. Time Fairy tells Little Tinker that to turn the clock back, the culprit of the disaster, i.e. Little Tinker, has to go through a test. If she passes the test, the world can be restored to what it used to be. What tests are awaiting Little Tinker? Can this “Data Disaster” be settled successfully? Can people in the earthly world use mobile data smartly and protect data on their mobile phones properly again?
